

Jerónimo Mayorca

Junior Dev

I am a **developer** and a **systems engineering student**. Since I was 13 years old, my best friends have been an Arduino board, a soldering iron, and many cables. Currently, I have **1 year of experience** working in web development. During this time, I have had the opportunity to work on both the **front end** and **back end** of a couple of apps. I am known for **learning quickly**, being **very curious**, and **highly resilient**. I greatly value **feedback** from my colleagues and always strive to be **assertive** and **sincere** in my communication. My goal is to be part of a team where I can **grow** professionally, **contribute value** with my work and knowledge, but above all, **continue learning a lot!**

Education

2022-now

Systems Engineering

Universidad de Caldas

2022

Bootcamp

Porter Metrics

2021

Bachelor's Degree

Colegio Gemelli

Expertise

- Python
- JavaScript
- Django
- Angular
- Tailwind
- SQL / No SQL databases
- Linux

Language

English (fluid)

Spanish (native)

Experience

○ May 2024 - Jun 2024

Jewelry

Freelance Project

Together with two friends, we developed a platform for a jewelry wholesaler. This website allows users to register and access an exclusive product catalog with special prices. Users can place orders and resell the merchandise at higher prices, thus maximizing their profits.

○ Aug 2023 - May 2024

HumphreySoft

Software Developer

During the time I held this position, I worked as a full stack software developer. My tasks were varied and included providing app support, creating sites for new clients, manipulating XML and JSON via APIs (REST and SOAP), modifying the API to return user-requested information, collaborating on the integration of a new module that allows users to generate their equivalent documents according to Colombian legislation, and integrating a chat within the application to improve user experience when requesting support.

○ Nov 2020 - Jan 2021

PC Tintas

Software Technician

During this time, my main responsibility was to receive defective equipment for repair. I also performed inventory, warehouse storage, and customer service tasks. This role allowed me to learn a lot about warehouse operations in this sector. Not only did I work during this period, but I also covered my colleagues' vacations while I was on my university breaks.
