Work Experience

Humphreysoft
FULLSTACK DEVELOPER

July 2023- March 2024
FinTech - B2C

RESPONSIBILITIES:

- Lead the research process to enhance the user and agent support experience.
- Participate actively in a market study to improve the operational costs of the software
- Analyze competitors and their products to build a market-added value product.
- Contribute to the creation of a new app module that allows users to submit their equivalent documents according to the latest DIAN resolution

KEY ACCOMPLISHMENTS:

- Improved support experience by implementing ZOHO chat.
- Reduced the platform's operating cost by 40% thanks to market research.
- Contributed with the creation of the DocTypes (Frappe Framework) for the new module.
- Debugged and fixed API issues with Python and Postman

Kevin's Jewelry
FULLSTACK DEVELOPER

May 2024- July 2024
Freelance

- **Front-End Development with Angular:** Led the front-end development of an administrative application for inventory management at Kevin Jewelry. Utilized Angular 17, incorporating a FuseThemes template to design a consistent and aesthetically pleasing user interface.
- **Backend Development with Nest.js:** Led the backend development of the application using NestJS, implementing JWT to manage user access to the platform. This collaboration was key to establishing effective communication with the PostgreSQL database, ensuring efficient and accurate inventory management.
- **Quick Adaptation to Client Requirements:** Demonstrated exceptional ability to quickly grasp and implement client-provided corrections and specifications. This skill was crucial in making efficient and precise changes to the system, ensuring the application met specific inventory management needs while continuously improving the end-user experience.

Skills

- | | | |
|------------------------|------------------|-------------------------|
