Jeronimo Mayorca Arias

Back-end Developer

+2 years of experience as a software developer with a deep understanding of the software lifecycle. Skilled at identifying problems easily and finding effective solutions. Enjoy getting involved in tasks beyond my responsibilities, always seeking new learning opportunities. Consistently take the initiative to explore new approaches to enhance my skills daily.

MOST RECENT WORK EXPERIENCE

FullStack Developer at HumphreySoft

July 2023 - March 2024 [FinTech, B2C]

RESPONSIBILITIES

- Led the research process to implement a solution aimed at improving the user and agent support experience.
- Conceived and studied new processes to reduce software operational costs
- Analyzed competitors and their products to build a market-added value product.
- Contributed to the creation of a new app module that allows users to submit their equivalent documents according to the latest DIAN resolution.

KEY ACCOMPLISHMENTS

- Improved response times and the support user and agent experience by implementing ZOHO chat.
- Reduced the platform's operating cost by 40% through a new vendor identified via my market research.
- Developed the views and forms for the new module using Frappe.
- Fixed issues with the API.

Backend Developer at Kevin's Jewelry

Abr 2024 - July 2024 [Freelance]

RESPONSIBILITIES

- Designed software to organize orders in a simple and scalable manner, following basic OOP principles and best practices.
- Led the team by providing technical support to meet deliverables, using Jira to track tasks.
- Built the backend of the application using NestJS and PostgreSQL.
- Contributed to the creation of the frontend using Angular and FuseTheme.

KEY ACCOMPLISHMENTS

- Successfully coordinated the team to deliver the software within the stipulated timelines.
- Our client noticed a significant reduction in the time it took to dispatch their orders.
- Our client was able to make their first international sale thanks to the website.
