ABOUT ME

I am a junior fullstack developer with 2+ years of experience, aiming to specialize in backend development. Throughout my career, I have worked on numerous projects that have enhanced my technical and teamwork skills, providing me with a deep understanding of the software development lifecycle.

WORK EXPERIENCE

Kevin's Jewelry (May 2024 - Jul 2024)

- Developed a website for a jewelry wholesaler in collaboration with two friends.
- Technologies used: Angular, FuseTheme, NestJS, PostgreSQL.
- Implemented a registration system and access to a catalog with special prices for resellers.

Software Developer at Humphreysoft (Jul 2023 - Mar 2024)

- Responsibilities: Contribute to the development of a new module for the app, support, fix printing formats and front-end issues, modify the API, and conduct API testing with Postman, create sites for new customers.
- Technologies used: Python, Frappe Framework, SSH servers, REST/SOAP APIs, Docker, Postman, Linux.
- Achievements: Integrated an instant chat with ZOHO in order to improve the user-experience asking support, contributed to the integration of a module for sending equivalent documents to DIAN, and fixed some API troubles.

Software Technician at PC Tintas (Nov 2022 - Feb 2023)

- Responsibilities: Receiving and repairing customer equipment, managing inventory, and providing customer service.
